CLEANSTIC – simply the best germ-killer

Every traveler should know that traveling and on vacation always have to be aware of a balanced fluid balance and adequate electrolyte intake.

The daily fluid requirement of a healthy European adult should not be less than 3 liters.

Clean drinking water is the most important food, it cannot be replaced. However, clean and safe drinking water must not contain any pathogenic microorganisms and should contain a minimum concentration of minerals.

Even in the best hotels - worldwide - the traveler must be constantly on guard not to contract a serious infectious disease through microbiological contaminated water.

The CLEANSTIC by CLEANAQUA Blue not only keeps you healthy while traveling, because it kills all germs in the water every second. There is no adequate alternative to it. The CLEANSTIC is like everything else from CLEANAQUA - simply the best.

With an order of minimum 1000 pieces, the list price of € 295.-/piece incl. VAT will mark down to € 199.-/piece incl. VAT.
